## SUMMARY

---

I am a passionate and versatile technology professional with a consulting background and proven ability to engage with customers in all phases of the software development lifecycle. My experience covers a broad range of roles including software engineering, development, integration, support, service delivery, project management and customer success which allows me to provide both strategic leadership and technical expertise. I am a persistent problem solver with an insatiable appetite for learning, and I am always working to expand my technical skillset. In addition, I have a strong personal interest in aviation including solo flight experience.

---
